### Descriere

---

Continuous water chiller for bakeries, SITEP C-R60 manufactured in 2016. The continuous water chiller prevents the proliferation of bacteria thanks to stainless steel coil, that makes water circulate without any contact with air. The double circuit cooling/evaporator ensures water hygiene also in case of breakdown of the cooling system. The tropicalized refrigeration unit allows the water chiller to fully work even in extreme temperature conditions, with room temperature up to +45°C. Installation and initial testing operations are simplified by the automatic filling of the tank. Furthermore, the maintenance of the water chiller is helped by the constant motion of the water due to the immersion pump and by the absence of extra pumps for water discharge, thanks to the pressure of the hydraulic system.

Production: 60 lt. / h;

Flow: 15 - 20 lt. / min;

Size: 112 x 50 x 55 cm;

Weight: 65 kg;

Power: 0,75 Cp / 1000 W;

Voltage: 230V / 50 Hz.

**ExWorks. Price is negotiable.**
